EDUCATION

Georgia Institute of Technology

Bachelor of Science in Computer Science

Atlanta, GA

Aug. 2023 – May 2027

Relevant Coursework : Data Structures & Algorithms, Linear Algebra, Probability, Discrete Math, Machine Learning

EXPERIENCE

IT Backend Developer

Jan. 2025 – Present

Georgia Institute of Technology | Part-time

Atlanta, GA

- Improved backend support efficiency by automating account provisioning, system access, and device setup workflows across Windows, macOS, and Linux environments with Python scripts, supporting 50+ users weekly.
- Reduced manual troubleshooting time by 30% by building scripting-based solutions for recurring operational tasks and using Vim to quickly modify system files, configurations, and backend support tools.
- Increased deployment consistency by standardizing workstation configurations and validating network-connected systems, contributing to 100+ successful device setups weekly.

Kitchen Crew Member

July 2022 – July 2024

Chick-fil-A

Atlanta, GA

- Prepared food in a high-volume kitchen serving 500+ customers per day while maintaining strict food safety standards.
- Collaborated with team members to sustain fast service times during peak hours, contributing to consistent customer satisfaction scores.

PROJECTS

CapsuleSpark | Startup, Kotlin, Jetpack Compose, Room, WorkManager, AlarmManager, Supabase

Apr. 2026

- Founded CapsuleSpark, a startup building an Android app to improve medication adherence by up to 35% for users managing 5+ prescriptions.
- Developed a native Android architecture with Kotlin, Jetpack Compose, Room, WorkManager, and AlarmManager for reliable reminders and local prescription access.
- Designed secure Supabase-backed authentication and cloud sync to support 1,000+ prescription records, 500+ users, and future caregiver and refill features.

Noted | TypeScript, Next.js, Tailwind CSS, Supabase, OpenAI API, Mapbox

Mar. 2026

- Built an AI-powered calendar builder that converts natural-language input, voice commands, and uploaded schedule images into structured weekly calendars using GPT-4o, supporting 9 event colors, recurring events, and drag-to-create/move with 15-minute snapping.
- Integrated Google Calendar import with calendar selection, conflict resolution, and color preservation, plus an interactive Mapbox map view with walking routes, reducing manual planning effort by an estimated 70%.
- Implemented full-stack infrastructure with Supabase authentication (email/password and Google OAuth), Row-Level Security for per-user event persistence, and localStorage guest fallback, supporting 100+ event records with 60% fewer malformed outputs.

Split View | HTML, CSS, JavaScript

June 2025

- Developed a Chrome extension used by 200+ users that splits a browser tab into multiple resizable panels, improving multitasking efficiency.
- Implemented responsive layouts using CSS Grid and keyboard shortcuts, reducing user interaction friction.
- Designed a privacy-first architecture with zero data collection or external server dependencies.

LEADERSHIP, CLUB, & VOLUNTEER WORK

Coding Instructor

Jan 2026 – Present

Black Student Computing Organization @ Georgia Tech

Atlanta, GA

- Taught 20+ students at ABC Learning Academy introductory programming concepts using Scratch, helping them build their first interactive games and animations.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C, C++, HTML/CSS, TypeScript, Go, C#, Assembly, Processing, Vim

Frameworks: React.js, Django, Spring Boot, Next.js, Node.js, Express.js, jQuery, NumPy, Jax, Pandas, OpenCV

Databases: MySQL, MongoDB, Firebase, Supabase, PostgreSQL

Tools/Platforms: Git, GitHub, Docker, AWS, RESTful APIs, Stripe, Jira, PowerBI, PyTorch, TensorFlow, NLP, Transformers, RAG, OpenGL, Excel, Microsoft Word, PowerPoint
